

knowledge area additive manufacturing

Become a partner on our **digital knowledge platform KEX.net – Knowledge Area Additive Manufacturing** and receive well structured and continuously updated information for this area. Stay informed regarding **innovative products, latest technologies, new materials, pre- and postprocessing and technology experts.**

Value Proposition

- Evaluate **your potential to apply Additive Manufacturing processes** in your future manufacturing value chain
- Don't miss any relevant development by receiving monthly updates from our **near-time technology monitoring service**
- Exchange and validate with relevant industrial players and experts from industry, research and academia
- Take the right decisions for your company at optimal **cost efficiency** utilizing the power of a unique knowledge platform
- All content is accessible by a set of **highly efficient search, filter and visualization tools**

Content

- **News:** Daily, curated additive manufacturing news from multiple highly relevant sources
- **Dashboard:** Get a comprehensive overview of relevant developments in the AM Industry and its R&D activities
- **Applications:** Find your potential application of 3D printing in hundreds of pre-evaluated components
- **Technology & Material Landscape:** Detailed and frequently updated knowledge database with more than 5.000 profiles in terms relevant manufacturing technologies, machines and materials
- **Near Time Monitoring:** Frequent monitoring service for all relevant technologies & materials based on automated R&D scanning, frequent expert interviews and fair visits
- **Reports:** Technical analyses regarding latest trend topics like 4D-printing or printed electronics

Basic Expert AM:

Available: since Q2 2019

Subscription Plan: 1 year

Accounts: 5 users per subscription

Costs: 800 € per month / 9,600 € pa

Introductory Offer

Subscription Plan: ½ year

Accounts: 2 users per subscription

Costs: 200 € per month (1,200 € total)
